WHAT'S INCLUDED?

1 Focusrite 2i2
Your audio interface provides a 2-mic input for simultaneous recording and playback of two channels. It allows you to independently control your headphones and monitor your inputs. This high-performing audio interface is how podcasters and content creators get their audio from their microphone to their computer for editing. It's a hassle-free way to start creating studio quality recordings from the instrument of your choice without unwanted distortion.

2 Microphone: 1 Lewitt LCT 240
This studio-grade microphone is equipped with livestream capabilities in addition to being a perfect solution for recording tracks, voice overs for your latest audio book. This mic can be used for all sound sources like vocals, acoustic instruments, amplifiers drums and more. Expect crisp studio-quality sound.

2 Microphone Stands
Your podcast kit comes with a sturdy microphone stand to serve as vessel for your mic. It has a compact and straight forward design perfect for a desktop or any surface. The height is adjustable so customize it to meet your needs

1 Headphones: AKG K92
Your kit comes with larger 40mm driver headphones with a close design, so you'll hear the full sonic range of your audio from airy highs to deepest of bass. They are comfortable and self-adjusting for a high-quality experience.

1 One of One Waterproof Case
Protect your precious audio equipment from harm with this especially rugged waterproof storage case. The case is constructed with professional quality to prevent impact, moisture, and microscopic dust from reaching your equipment, all while making podcasting on the go easier.

2 Custom Cables
Finding the right wire to connect to studio quality equipment is a lot harder than you think. Your One of One audio kit equips you with the custom cables you'll need to create audio magic without guess work. This is especially helpful for new podcasters who don't yet have a closet full of equipment.

Free software included.
